We the following residents are in total opposition to the Councils pending decision to first close Symes Bridge to vehicle traffic and then to totally remove it. That bridge is a part of the heritage of St John's West (the Waterford Valley). That bridge has been there for many years and while adding to the character and beauty of the area it also is needed for the many people who drive over that bridge to connect with Waterford bridge road. To only be able to exit this area via Southside Road is not viable and also putting said residents at risk. You cannot safely make the turn to Southside road especially left because it is not wide enough & you cannot see as cars are also always parked there, due to lack of parking. In the winter it is a nightmare. While the Symes bridge road exit is not the absolute best it is wide enough & you can actually see to pull out. I have never heard of an accident there in that area and I can remember my father using that exit since the 1960's or more.

The residents of Southside Rd fought to get speed bumps because of cars speeding & too much traffic on a little road which cannot handle it, removing Symes bridge would only be adding to that

traffic as well. We spend money on other projects, some not as useful as restoring the Symes bridge. Lets do the right thing & spend the money to keep the heritage of the Waterford Valley and the beauty as well as the practical.

TAX Payers of St John's West Waterford River Valley

1	Oliver Crane	20	Ed Hillier
2	Bailey Fitzgerald	21	Cheryl Hillier
3	Patrick Power	22	D. White
4	Jeffrey Leivitz	23	P. White
