To whom it may concern,

I live right by Pi and I fully support their application for an outdoor eating space. They have always been great and respectful neighbours and it would be a very positive addition to our block. I really can't think of any good reason why this should not proceed! I very much hope this is approved and I know it would be a fantastic addition to the neighbourhood.

Thank you,

**Subject:** (EXT) Support for Pi Eatery's discretionary application for outdoor space

Hello,  
I am writing in strong support of Pi Gourmet Eatery's discretionary application for an outdoor eating space.

I live in a neighborhood nearby the restaurant and fully support small businesses innovating and integrating into the downtown in every way possible. I go to Pi frequently and it is a draw into the whole area.

It's placement next to a taxi stand and across from several other businesses (sushi restaurant, Yoga studio, Auto mechanic, butcher shop and corner store), along with a row of quintessential downtown "Jellybean" houses makes it the perfect place for an outdoor eating space as it is already a mixed res-comm block and a beautiful "St.Johns-y" spot for tourists and locals to soak up the downtown character.

With the other commercial businesses already operating all around it in between the houses, there can be no reasonable objection to this simple request to keep from losing business during good weather.

Pi was one of the first places in town to really innovate and broaden food options in the city and those risks and that leadership have paved the way for the current successes and stellar global reputation of the St. John's food scene. I cannot hammer home enough how extremely important it is for us, as a city, to support innovators and give entrepreneurs the space they need to succeed, it is essential to our success.  
The retail and hospitality industries are no different than the tech industry. Let them be geniuses and also feed us delicious food on a sunny deck. magic.

This may seem like a small decision but please do not deny this business (and its patrons) the chance to survive and thrive and continue to improve the diversity and livability of this place.

Plus holy Jesus have you tried their pickle pizza?

Hello, I would like to voice my support for this application for a deck outside Pi Gourmet Eatery at 10 King's Road. I live nearby and it would be an excellent addition to the neighbourhood.

Thank you.

To whom it may concern -

As nearby residents of Pi Eatery, we are very much in support of their application to build an outdoor deck. A deck would allow them to compete better with the many other food-service decks operating on Duckworth and Water St.

We are frequent customers of Pi and in the summer months the pizza ovens make the indoor temperature in the restaurant quite warm.

We would welcome access to an outdoor deck and think it would add to the success of the business during the summer months. The hours of operation in the application indicate the deck would close by 9 p.m. and we think this minimizes the noise imposition that might be experienced by nearby residents.

Lastly, Pi is a successful, long-term business in the downtown that deserves to be supported by the City and its residents. We encourage Council to approve this application as the business will be positively impacted, and residents and visitors will have continued access to a great eating venue. One of the best and affordable eating establishments in the downtown.

Regards,
