Comments (verbatim)	What is your overall feedback of this application?
I give my blessings to this project	Support
Sounds good	Support
I definitely support wetlands map extension, we need more environmental parks / trails around neighborhood.	Support
As a residents of Southlands, we definitely support the to extend the map of wetland protection.	Support
Please extend the wetland! It's so important for the homes in the area to have this wetland especially for big storms and major weather events.	Support
Fully support this update. This should also include a future update to the zoning of properties along Great Southern Drive (INST and R1 to Open)	Support

Public Q&A Questions (verbatim)	Public Response
Can you clarify that the area north of the pink line is new and an extension of the wetland?	Thank you for your question. That is correct, the area north of the pink line shows the newly identified wetland area that meets the criteria for wetland protection and will be added to Map 4
I'm in full support of protecting ecosystems. Is there any way to increase the protected area so that it has more of a buffer zone from future development?	Thank you for your question. The buffering requirements are set out in Section 4.10 of the Development Regulations, and no changes to these requirements are proposed at this time. The minimum buffer adjacent to protected wetlands is 15 metres from the edge of the wetlands.
